

1. Dashboard

After login, the user lands on the **Dashboard**.

Primary Action:

- **Upload Document**
-

2. Upload Document

The user begins the process by selecting **Upload Document**.

Supported File Types:

- PDF
- DOCX
- PNG
- JPG

Once the document is successfully uploaded, the user proceeds to the signing mode selection.

Multi-Signer Workflow (Send to Multiple Signers)

3. Add Signers Setup

The screenshot displays the 'Add Signers Setup' interface within a rounded rectangular container. On the left, there is a vertical sidebar with two numbered boxes: '1' and '2'. The main area contains two signer entry forms, each with a light blue header bar. The first form, corresponding to box '1', has a 'Name' field with a red asterisk, a small person icon, and the text 'Demo Test'. Below it is an 'Email' field with a red asterisk and the email address 'gotanoh494@carvect.com'. To the right of the fields are two buttons: 'Needs to Sign' with a pencil icon and a dropdown arrow, and 'Customize' with a dropdown arrow. A trash icon is also present. The second form, corresponding to box '2', has similar fields but is currently empty. The interface uses a clean, modern design with a light gray background and subtle shadows.

After selecting **Send for Signatures**, the user enters the **Add Signers** screen.

Information Required for Each Signer

- **Full Name**
- **Email Address**
- **Role:**
 - Needs to Sign
 - View Only
 - Receives Copy (CC)

Additional Capabilities

- Add **unlimited** signers
 - Choose **Signing Mode: Order / Inorder**
 - **Order:** One-by-one signing
 - **Inorder:** All signers receive the document at the same time
-

4. Document Editor

The screenshot displays the 'Document Editor' interface. On the left, a sidebar titled 'Upload Document' includes a note about a 15 MB PDF limit and four buttons: 'Quick Access', 'My Templates', 'Shared with me', and 'Local file'. Below these is a 'Recipient' section with a dropdown menu showing 'Demo Test' and a 'Required Field' checkbox. The main area contains three form fields: 'Document Title' (with a placeholder 'Enter Document Title'), 'Category' (a dropdown menu currently showing 'Miscellaneous / Personal'), and 'Expired Date' (a date picker showing 'mm/dd/yyyy'). A large 'Preview' window below these fields shows 'No file selected'. A green 'Next' button with a right arrow is located at the bottom right of the main area.

Same two-panel layout as self-signing, but with **signer assignment features**.

Left Panel

- Real-time Document Preview

Right Panel

- E-Sign Tool
- Stamp Tool
- Date Tool

1) E-Sign Tool

Signature options:

- Initials
- Full Name Signature

Input methods:

- **Text:** Type name → auto-generated signature style
- **Draw:** Create signature via mouse/touch
- **Upload:** Upload an existing signature file (PNG recommended)

The user places the signature via **drag & drop**.

2) Stamp Tool

- Upload stamp image (PNG/JPG)
- **Drag & drop** onto the document

3) Date Tool

- **Auto-Fill:** Inserts today's date
 - **Manual:** Calendar selector
 - Can be placed using **drag & drop**
-

Signer Assignment Logic

Every placed field must be assigned to a specific signer.

Color Coding Example:

- Signer 1 → Blue
- Signer 2 → Yellow
- Signer 3 → Green
- (Additional signers get unique colors)

Purpose:

- Only the assigned signer can fill, sign, or complete that field
 - Sender clearly sees which signer is responsible for each action
-

Two-Step Placement Process

1. Place the field (drag & drop)
2. Assign it to a signer

Rule: System can ensure each signer has at least one required action.

5. Review & Send

Final review screen displays:

- Document preview
- List of signers
- Signing order Order/Inorder
- Custom email message
- Optional reminder settings

User clicks **Send for Signature**.

6. Signer Experience (External Flow)

Each signer receives:

- Email notification
- Secure access link

When a signer opens the link, 3 options appear:

a) I Agree

Opens the document editor with:

- Only assigned fields visible
- Available tools (Signature, Stamp, Date) based on assigned tasks
- Start button highlights the first required action
- Automatic navigation to the next required action

After completing all actions → signer clicks Finish.

b) Decline

- Signing stops for that signer
- All participants receive a notification

c) Assign to Someone Else

- Signer can forward responsibility
- New signer receives a secure link
- Sender is notified

The screenshot shows a dark-themed 'Upload Document' form. On the left is a sidebar with four buttons: 'Quick Access', 'My Templates', 'Shared with me', and 'Local file'. The main area contains three input fields at the top: 'Document Title' with a placeholder 'Enter Document Title', 'Category' with a dropdown menu showing 'Miscellaneous / Personal', and 'Expired Date' with a placeholder 'mm/dd/yyyy' and a calendar icon. Below these is a large 'Preview' section with a light gray box containing the text 'No file selected'. At the bottom left of the main area is a red 'Required Field' label, and at the bottom right is a green 'Next' button with a right arrow.

7. Completion

After all required signers finish:

System generates:

- Final signed PDF
- Execution certificate
- Audit trail

All participants receive the completed document.

Dashboard updates status to **Completed**.

System Behaviours & Policies

SYSTEM RULES & POLICY LOGIC (Applies to Entire Workflow)

1. Rejection / Decline

- Workflow immediately stops
- Document state → Declined
- Document becomes read-only/locked
- Sender notified
- Remaining signers informed

2. Invalid Signature Handling

- System(sender,signers) flags incorrect/invalid signatures
- Signer must redo before progress
- Cannot proceed until fixed

3. Timeout Policy

- Auto-decline after X days (configurable)
- Sender receives timeout notification

4. Visibility Controls

- Each signer sees only their assigned fields
- No visibility into other signers' actions, emails, or roles

5. Completion Logic

- All required fields must be completed
- System marks workflow as Completed
- Final signed PDF
- All participants notified

6. Post-Send Editing Rules

- Once document is “Sent for Signature” “Signature is done”→ editing disabled
- Any changes require starting a new workflow

7. Multi-File Workflow Coordination

- If multiple files are part of a package
- Workflow completes only when all files are signed
